

Tableau Cloud Migration Accelerator

As organizations continue to modernize their data platforms by migrating to cloud technologies, Tableau has rolled out Tableau Cloud and is encouraging customers to embrace their SAAS offering. Slalom has developed an accelerator to help clients migrate from Tableau Server to Tableau Cloud with a fast, trusted, and cost-effective process.

Slalom is recognized as 8x Tableau Partner of the year with hundreds of Tableau certified consultants and thousands of project delivered globally, we continuously bring innovation and cutting-edge solutions.

BENEFITS OF TABLEAU CLOUD

- Reduced infrastructure management, 99.9% uptime
- Reduced admin and cost overhead
- Scalable to fit client’s adjusting needs
- Cloud is first to receive Tableau’s new features
- Allows organizations to focus more on insights and analytics

HOW WE’RE DIFFERENT

- Industry expertise in supporting Client’s migration journey
- Opportunity to go beyond just a lift and shift
- Up-to-date information on Tableau’s new releases and API enhancements through our close partnership with Tableau

WHAT OUR OFFERING INCLUDES

- Comprehensive portfolio of scripts, analysis starter files, and project management resources to complete all phases of the migration
- Resources to implement Tableau best practices, improve governance as well as communicate change management to limit business user impact

Accelerating your Tableau Cloud migration journey
