# Tableau Pulse

## Reimagining the Analytics Experience

Learn how Slalom can help accelerate your data journey with AI-driven, personalized, and frictionless analytics experiences.

Data is everywhere, but how do you make sense of it? How do you turn raw numbers into meaningful stories that inform your decisions and actions?

With **Tableau Pulse**, you can transform your data into actionable insights, enhance decision-making, and optimize performance across your organization.

Tableau Pulse leverages AI to deliver intelligent, personalized, and contextual insights within the flow of tools you already work in. Insights are made more accessible through Pulse's easy to use Natural Language Interface.

## OVERVIEW

Tableau Pulse is a reimagined data experience that democratizes analytics by making insights more accessible to users regardless of their expertise with data visualization tools.

Tableau Pulse can provide a more impactful analytics solution by presenting key metrics and details on drivers delivered directly to users in their flow of work in Slack, email, Tableau, and Salesforce.

## KEY FEATURES

Tableau Pulse leverages AI and statistical analysis to provide insights about key metrics defined by the business.

It ranks and summarizes these insights and presents them in natural language leveraging [generative AI](#), allowing users to dive deeper through guided follow-up questions and suggested prompts that are surfaced based on the data's context.

## Unleash the full potential of Tableau with our expertise.

### HOW SLALOM CAN HELP

- Implementation and configuration
- Tableau Cloud migration (Tableau Cloud is a pre-requisite for Tableau Pulse)
- Solution development
- Data strategy
- Training and enablement

### WHY SLALOM?

We are passionate about helping our clients achieve their goals with data.

We have a team of certified Tableau consultants who can help you with any Tableau challenge, from data preparation and governance to dashboard design and optimization.
